No. 25.

FROZEN WILE.

A New Industry in Denmark that Promises to Be Very Profitable.

OTTAWA, June 22.-Canada's representative in Denmark reports that during the past year a new industry has been established there, which promises to prove both profitable and serviceable, and which might be followed with equal success on this side of the water, viz., the shipment of frozen milk to large cities.

A year ago a Danish merchant experimented in this direction by taking Danish milk, which is peculiarly delicate and rich in flavor, freezing it by the use of ice and salt, and sending it in barrel, by rail and steamer, to London. On its arrival the milk proved to be as sweet and well tasting as if it had been just drawn from a cow in the middle of Sweden.

The milk was so much in demand and proved so profitable an article of commerce that the exporter immediately took out a patent on the shipment of frozen milk from Sweden and Denmark to London. He then sold the patent to a stock company with large capital, which on Feb. 1 last bought one of the largest Swedish creameries, converted it into a factory, and, having put in a special freezing apparatus, began on May 1 the export of frozen milk in large quantities.

When the milk is received from the farmers, it is pasteurized, that is, heated to 75" Celsius and then immediately cooled off to about 10° C., and now the freezing is commenced. Half of the milk is filled into cans and placed in the freezing apparatus, where it will be thoroughly frozen in the course of three hours. The frozen milk is then filled into barrels of pine, the only kind of wood that can be used. The barrels, however, are only half filled with this frozen milk, the balance being filled with the unfrozen milk.

This way of packing has proved to be the only practical one, as part of the milk has to be frozen in order to keep the whole cold, and part has to be in a flowing state in order to get the barrels exactly full, which is necessary in order to avoid too much shaking up on the road, by which the cream would be turned into butter; the floating masses of ice at the same prevent the unfrozen milk in setting the cream. Milk, which is treated in this way, has proved to keep quite fresh for twenty-six days. Every barrel holds 1000 pounds of milk, and twice a week there will be shipped fifty barrels, making in all 100,000 pounds of milk a week,

The milk is shipped to Newcastle and from there by rail to large manufacturing cities, where it is sold in the streets or in retail stores. It is reported that the patent has been bought for Ireland also at a cost of over \$200,000, which proves how much the stock company expects from this new enterprise.

The time may not be far away when the dairy farms of the New England and Western States may be sending not butter and cheese, but frozen milk and cream to the large centres of both continents.—N. Y. Sun.

### Sans Souci.

The most lovely spot on Oahu is Sans Souci. This favorite seaside resort, which has been immortalized by the pen of Robert L. Stevenson, who resided there for months, is only four miles from Honolulu and within easy reach of the tramcars. within easy reach of the tramcars. The surroundings and bathing at this famous resort are superior to anything found in the Hawaiian Islands. Cottages and board can be obtained on easy terms. The table set by the manager is better than any offered here at other hotels. For picnics, bathing parties and outings the best accommodation can be secured by giving notice to the manager.

Ring up 841, if you have anything to say to The Independent.

TIME TABLE.

C. L. WIGHT, Pres. S. B. ROSE, Sec. Capt. J. A. KING, Port Supt.
